

# WATERPROOFING

## FLAT ROOFING SYSTEMS

It goes without saying the waterproofing of your flat roof is pretty important. Perhaps the most important part of the whole project. By their nature flat roofs are more prone to leaks than pitched, and you need to make sure water stays out for the lifetime of the building. As the largest specialist supplier of roofing materials in the UK Roofshop has everything you need to keep your flat roof dry. Here are some of the products you could use.

Product Category	Products	Materials Cost → Low - High →	Accessories Cost → Low - High →	Installation Speed → Fast - Slow →	Required Components
 GRP Roofing Systems	GRP 20 Years	→→→→	→→→→	→→→→
