BRAND NEW

Scott Bader rebrand and launch a new website for their CrysticROOF® range!

Since its inception, CrysticROOF has gone from strength to strength to become a market leader in the roofing industry. To such an extent, the company decided it was time for a branding refresh. You can visit the new crysticroof.com to see the new branding, new literature and even a new video giving you a whistle-stop tour of the CrysticROOF range to find out more!

DRY FIX SOLUTIONS SECURE BRE APPROVAL

The new British Standard BS 8612 ensures Dry Fix roofing products pass physical demands like vertical load for wind uplift, tensile strength and rain drainage as well as an accelerated colour fast test for aesthetics. As Ubbink pride themselves on supplying quality, easy-to-install products, they had both their Universal Ambi Dry Verge System and Ventilated Dry Ridge kit independently tested at the BRE (Building Research Establishment).

Both systems surpassed the intensive testing process reassuring installers, specifiers and merchants that Ubbink Dry Fix solutions meet the latest regulations.

BMI Apprentice of the Year

As this year's BMI Apprentice of the Year competition gets closer, previous finalists have been reflecting on what the experience taught them.

And it's overwhelmingly positive. Winners and contestants alike report they are now taking on more

responsibility in their roles, with some representing the industry as Construction Ambassadors with the CITB. There have also been great benefits for their employers; apprentices are able to run jobs and act independently, putting into practice the business understanding,

communication skills and confidence acquired from the two-day finals.

This year's exciting final takes place on July 2nd and 3rd and you can keep up with all the developments from this year's competition at <https://bit.ly/2S9Lt8R>

MODULAR GLASS ROOFLIGHT RANGE

FIX-R's range continues to expand to offer roofers a variety of flat roofing products that hit the spot for usability and price. Their new Glass Rooflights are quality specification modular glass rooflights, available to order in a wide range of sizes and fixed, manual or electric opening options.

- Double glazed toughened/ laminated glass
- Warm edge space bar
- Vertical PVC upstand
- Combined Unit u-Value 1.26 W/m²K
- CWCT tested to Class I

Order before 11am for next day delivery!

Offsite Panelling 2.0

As the demand for scalable offsite construction is greater than ever, finding a panel that's perfect for offsite manufacturing is increasingly important. Ideal for the most demanding structural applications, SMARTPLY ULTIMA is the perfect choice.

Like the rest of the MEDITE SMARTPLY range, this next generation OSB4 panel from MEDITE SMARTPLY has been created with zero-added formaldehyde. It's also the strongest, most moisture resistant OSB4 panel ever

produced by the company. Large panel formats up to 2.8m wide by 7.5m long, with a maximum thickness of 40mm are available.

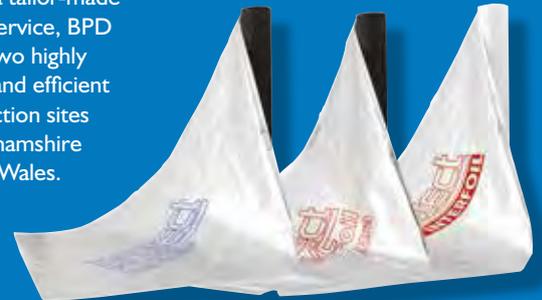

MEDITE SMARTPLY Product Manager Colin Wheatley commented: "With new offsite factories emerging across the country, we aim to deliver a panel that meets the scale and structural demands required."

WIENERBERGER BUYS BPD

To strengthen its position in the roof market, Wienerberger has acquired BPD. As a prominent producer of roof underlays, wall and construction membranes, building ventilation systems and specialist roof products, BPD will become a centre of excellence for innovative roofing solutions. With a large product offering including the Protect, Passivent, Glidevale and Kingfisher brands, as well as a tailor-made solutions service, BPD operates two highly advanced and efficient UK production sites in Nottinghamshire and South Wales.

Did you know

Better reporting to combat falls

Just under half of the falls from height fatalities in 2017 were within the construction sector, according to the HSE.

In March, the Working at Height All Party Political Group recommended better reporting and a change in culture to improve falls from height statistics. Following an extensive inquiry, which the NFRC took part in, their report **Staying Alive: Preventing Serious Injury and Fatalities while Working at Height** recommends:

- Enhanced reporting through RIDDOR, which at a minimum, records the scale of a fall
- An independent body allowing confidential, enhanced and digital reporting of all near misses and accidents that do not qualify for RIDDOR reporting
- Extend the **Working Well Together - Working Well at Height** safety campaigns
- Extend Scotland's Fatal Accident Inquiry process to the rest of the UK.

BRIEFS

Double top

Are you a member of Trade Club? If not, you could be missing out on the opportunity to earn back up to £99.99 a month. Every time you buy supplies at your local SIG Roofing branch, you'll earn points which are converted into a voucher for you to spend the following month. You can even double your points on selected own label products. Join the club at sigroofing.co.uk/tradclub

Get yourself a 6-pack

For those after a high-quality, single component adhesive sealant with very fast strength build-up, Soudal have just launched the Fix All Turbo 6 Pack.

Now available from your local branch the Fix All Turbo is based on SMX-Polymer and gives the highest final bond strength. It's permanently fixed in just 20 minutes, reaching its peak bonding capacity after just 3 hours.

@SIGRoofing
Did you spot us on **@LABMmag**? We discussed how we are supporting 11 apprentices through the Re:allies Framework, an initiative that provides smart procurement to asset management solutions.

@SIGRoofing
We are thrilled to be supporting **#RoofCert** which is jointly funded by **@CITB_UK** and **@TheNFRC** and is seeking to establish a formal standard for roofing operatives that will be recognised by both consumers and companies. Read more in **@RCIMag**.

LOCAL HERO

READ THE FULL STORIES AT SIGROOFING.CO.UK/LOCALHERO

CONGRATULATIONS TO OUR THREE FINALISTS IN THE LOCAL HERO AWARD AT THE NFRC UK ROOFING AWARDS.

LOCAL ROOFING HEROES 2019

BEN LARGE

SEAN DAVIS

ROSS GOLDER

ROSS GOLDER OF ST AUSTELL'S GOLD ROOFING IN CORNWALL, BEN LARGE FROM BPL ROOFING IN CADDINGTON, BEDFORDSHIRE AND SEAN DAVIS FROM RIVERSIDE ROOFING IN WIGAN WERE ALL SHORTLISTED FOR THE AWARD, SPONSORED BY SIG ROOFING.

BEN AND HIS TEAM WERE ANNOUNCED AS THE WINNERS FOR THEIR WORK IN COMING TO THE RESCUE OF A FAMILY WHOSE HOME HAD BEEN LEFT IN AN UNSAFE STATE BY ROGUE BUILDERS. THEY LEAPT INTO ACTION AFTER SPOTTING A FACEBOOK POST DETAILING THE DISASTROUS PROJECT. AFTER RECEIVING £38,000, THE BUILDER BECAME IMPOSSIBLE TO CONTACT

AND THE FAMILY WAS LEFT WITH MISSING WINDOWS, HALF-BUILT WALLS AND PILES OF RUBBLE THROUGHOUT THEIR HOME.

BEN SAYS: "I'VE WORKED IN THE ROOFING INDUSTRY FOR QUITE A NUMBER OF YEARS, BUT THIS WAS ONE OF THE WORST EXAMPLES OF SHODDY WORKMANSHIP I'VE EVER SEEN. PEOPLE PUT A LOT OF TRUST IN ROOFERS, AND IT'S HORRIBLE TO SEE THIS TRUST ABUSED.

"HELPING THIS FAMILY OUT WAS JUST THE RIGHT THING TO DO, BUT BEING NAMED AS A 'LOCAL HERO' BY THE UK ROOFING AWARDS MEANS THE WORLD TO ME."

ROSS GOLDER'S ONGOING FUNDRAISING EFFORTS FOR KIDS FOR LIFE, A CHARITY SUPPORTING CHILDREN AND YOUNG PEOPLE LIVING WITH CANCER THROUGHOUT THE UK, MADE HIM A STRONG CONTENDER FOR THE AWARD. HAVING FIRST BECOME INVOLVED

WITH THE CHARITY JUST TWO YEARS AGO, ROSS HAS ALREADY RAISED A STAGGERING £150,000.

ROSS HAS ALSO LAUNCHED A COMPANY FUNDED-'CONCIERGE' SCHEME TO HELP PEOPLE DONATE BLOOD.

SEAN DAVIS' STRONG SENSE OF COMMUNITY SPIRIT, HAS SEEN HIM DELIVER PROJECTS FREE-OF-CHARGE FOR VULNERABLE OR ELDERLY HOMEOWNERS WHO HAVE BEEN TAKEN ADVANTAGE OF BY COWBOY BUILDERS. IN ONE CASE, SEAN DROPPED EVERYTHING TO WORK ON A TIME-SENSITIVE PROJECT FOR A HOMEOWNER WHO HAD BEEN DRASTICALLY OVER-CHARGED BY A BOGUS BUILDER FOR A SHODDY JOB.

STUART BASE, MARKETING DIRECTOR AT SIG ROOFING, ADDED: "THE LOCAL HERO AWARD IS ALL ABOUT SHINING A SPOTLIGHT ON THE VERY BEST THE ROOFING INDUSTRY HAS TO OFFER, AND THESE THREE FINALISTS ARE FANTASTIC EXAMPLES OF THAT. THEIR COMMITMENT TO THEIR COMMUNITY IS WHAT THIS AWARD IS ALL ABOUT."

BURSTING WITH ESSENTIALS

It's not always possible to anticipate exactly what you'll need each day, and what items might run out in the middle of a job. It's hugely reassuring to know that you can lay your hands on everyday materials at a moment's notice, though.

With that in mind, you can rely on finding SIG Roofing's **CORE RANGE** essentials in your local branch every time you visit. Whether you need specialist items such as graded batten, tile clips and lead sealant or basics like disposable gloves and a replacement trimming knife, everything is under one roof.

The extensive **CORE RANGE** of 200+ essentials is always available and in stock for all your roofing projects, guaranteed.

In the unlikely event that the item you want is not available you'll receive a free breakfast. Plus, you'll have your requested product within 24 hours.

For the full **CORE RANGE** product list and terms and conditions of the guarantee, visit sigroofing.com/corerange.

Contemporary and bird-free

The challenge

A brick building with red Norfolk pantiles on the roof was run down, outdated and badly insulated. As a replacement, the owner wanted a contemporary looking roof slate with modern performance.

The solution

The owner became aware of Cembrit Westerland slates after extensive research: “We wanted a light weight option that would look natural in its surroundings and would colour match the windows.”

A total of 3,000 Westerland slates and 30 metres of Cembrit Slate Duopitch Ridge Ventilation were used to complete the re-roof carried out by Scott Sell Roofing. The owner didn't want cement edges to the gables as a finishing detail, so opted for Cembrit PVC dry verges, to provide a perfect colour match and create a consistent finish across the roof.

What we learned

There are a number of benefits to using Westerland slates. The new roof eliminates the problem of moss growing and rolling down the gutters. Also, due to the surface of the ridges, birds no longer perch on the roof and leave mess, meaning the roof always looks spotless! With the slates correctly installed and tight-fitting, there is no draught between the slates and animals can't get in. The Cembrit slates have also reduced the weight of the roof by 4 tons, which means no more creaking timbers or rattling tiles on a windy day!

www.cembrit.co.uk

The challenge

The Fairways is a three-storey building in West Molesey recently refurbished by PA Housing that needed a new rainwater system, fascias and soffits.

Crucially, as the property provides social housing, the products used needed to reduce the scheme's operational costs long term.

The solution

Marley Alutec's Evolve Deepflow round guttering and Evoke fascias and soffits were selected for the project. These aluminium systems are highly corrosion resistant, so will never rust or need re-painting and have a life expectancy of up to 50 years or more.

The Evoke range is also available in a choice of 12 PVDF paint options, which includes Nano surface technology - resistant to dust, grime and algae build-up, reducing the need for regular maintenance.

The quality of the products and the ease of installation meant roofing specialists, RC Grant & Sons Ltd, installed the Evoke and Evolve systems easily within the six weeks they had on site.

What we learned

Marley Alutec provided technical support to the roofing contractor

throughout the project, from the early planning stages to final installation. This enabled the project to run smoothly within tight time restrictions, creating a solution that both PA Housing and Building Surveyor, Churchill Hui were delighted with.

www.marleyalutec.co.uk

PROVIDING A LOW MAINTENANCE RAINWATER SYSTEM SOLUTION

With roofers coming bottom of a Which? survey of members last year on the trustworthiness of 13 trades, INSIGHT looks at how contractors can increase consumer confidence.

What issues caused most concern?

- not turning up on time
- poor workmanship
- being ripped off.

The Which? survey suggests the public's perception of roofers is pretty low. Fewer than five out of every 10 people in the survey* felt roofers were trustworthy, compared to top-scoring electricians who received eight out of 10 positive votes.

So, what measures can you take to reassure prospective clients about your company's reliability?

Timekeeping

While it can be hard to judge timing when jobs are running over or traffic is heavy, turning up late is clearly an issue with consumers. If you are delayed, call and let people know before your expected arrival time. Always confirm start dates and times plus the project duration so your customer can make necessary arrangements.

Paul Bone's role is focused solely on looking at new jobs. He says: "Communication is so important. Start times can change due to weather, but we always give 24-48 hours' notice

and I call ahead if I'm running late for an appointment."

Photos

Richard Bridger says: "I usually take pictures of the roof before, during and after. If the timber roof deck needs replacing or repairing, once it's covered over you can't see it, so it shows people the extent of the work you have done."

Mark Pancoust agrees: "Pictures show clients proof of what it looks like before you start and help explain what's needed."

Paul Bone emails pictures with his invoice to show the completed work.

Credentials

Include membership of associations and liability insurance on your advertisements and estimates. "I always put 'Please ask to see a copy of my public liability insurance' on my quotes," says Richard. "People need to know you've got it and lots of customers do ask to see it. I'll also mention that I'm an approved contractor of a product, if it's relevant to help explain what's needed."

Mark includes his membership of the Guild of Master Craftsmen on his advertisements.

Recommendations

All of our roofing panel members Paul, Mark and Richard get many referrals from previous customers, but also ask them to write reviews on Google and sites such as Checkatrade and Trading Standards' Buy with Confidence. They might use the reviews as a prompt and refer to their recommendations and testimonials when undertaking a site inspection.

Our roofing panel:

Mark Pancoust
of Advanced Roofing,
Northampton

Paul Bone
of Kingsley Roofing,
Northampton

Richard Bridger
of Highworth Felt Roofing,
Swindon

If you'd like to join the panel, please email marketing@sigroofing.co.uk

Hambleside Danelaw solutions for abutment detailing

1 Do I need to use both a continuous soaker or secret gutter in combination with your individual tile soakers?

Depends on the application. In a position exposed to high wind and rain, particularly with low roof pitches, then yes. This also applies when you have a large, multi-storey abutment wall next to the roof creating high levels of water run-off.

2 What is the benefit of using your individual soakers when I have lead on site?

Apart from the cost, using a preformed product significantly speeds up installation and avoids using lead where the water is being recycled.

3 How do I seal your individual tile soakers to stop water passing underneath?

The individual soakers that fit over the top of the tiles are not designed to prevent water from passing underneath. They cause the rainwater draining below the product to drain out onto the course below.

Warranties

“Product warranties go down well with consumers and I mention them on the quotation. An insurance-backed guarantee from a manufacturer gives them confidence,” says Richard.

Mark offers a 12-year warranty on his company’s workmanship on a large area of roof repair and new roofs. As a member of the NFRC, Paul’s company is able to offer an insurance-backed guarantee on work.

SIG Roofing’s ONE Warranty scheme enables contractors to offer a 15-year warranty for all the key elements of the roof from just one source. Providing peace of mind, it covers product performance. Dozens of leading manufacturers’ products for both pitched and flat roofs are included.

Once you register, you can offer ONE Warranty to your customers provided you use only products from the approved list. A ONE Warranty leaflet is available to leave with customers to explain the benefits. After the job is complete, simply submit an application to cover the job. When verified, both you and the customer receive a certificate as confirmation. For more information visit sigroofing.co.uk/onewarranty

How to prevent gable end staining

Staining on gable end walls, caused by water shedding from inferior or incompatible dry verge systems, is still a concern, despite the new Dry Fix Standard, BS 8612. To prevent this, consider drainage performance when you choose a dry verge system - just looking for BS 8612 compliance isn’t enough!

Marley’s new Ashmore dry verge protects against gable end staining, with special in-built features, such as multiple drainage channels to direct water away from the wall. To ensure a secure fix, it also includes a batten end clip, which is a quick, robust way of achieving mechanical engagement with the batten.

Specially designed to complement its Ashmore double interlocking plain tile, Marley’s Ashmore dry verge is also fully compatible with other interlocking plain tiles on the market.

For more information, visit www.marley.co.uk/dryverge

AA FIRE RATING IS A HOT TOPIC!

An EXT.FAA fire rating means that a roof build-up system has been tested in accordance with BS 476 part 3 and passed to the highest level.

The ‘EXT’ relates to the external performance when exposed to the risk of fire spreading to the roof from an adjacent building, rather than a fire from within the building itself. The ‘F’ relates to ‘Flat’ as opposed to sloping. The First A relates to penetration whilst the second relates to spread of flame.

Products, systems and build-ups have been formulated, designed and tested to ensure BS compliance holistically.

One product comes with the top fire rating possible, AA. Look out for SIGnature’s torch-applied built-up roofing system for flat and pitched roofs. Exclusive to SIG Design & Technology, the range is BBA accredited, robust, tried and tested.

A cold applied self-adhesive underlay is available and the option of either torch applied, or self-adhesive aluminium lined, vapour control layers are accompanied by a full range of insulation and ancillary products. SIGnature Torch-On carries a full system warranty of either 20 or 25 years.

A scorching result all round!

ACADEMY ROOF IS GUARANTEED TWICE

The challenge

Re-roofing Oakfield Academy in Frome was definitely a challenge. For one thing, the sheer number of separate roofs - 11 pitched and 15 flat - meant a total roof area of 3,500m² to cover! The academy also needed funding from the Education & Skills Funding Agency and wanted the finished works guaranteed.

The solution

After a successful funding bid, all the roofs were replaced by winter 2018, and are backed by guarantees of 15 years or more.

Crucial to the success was how BMI UK & Ireland worked with surveyors Ridge & Partners on the funding application. They completed the survey - including core samples of the existing flat roof - and provided a specification for the tender process.

Ridge & Partners opted for BMI Icopal system for the flat roofs and then chose the BMI design service for the pitched roofs. This was because it required an approved system with the appropriate guarantees. When Redland and Icopal merged to become BMI, it made sense to use both their pitched and flat solutions, so Ridge & Partners had a one-stop shop.

What we learned

Academies need guarantees that are enforceable and a solution that simplifies the maintenance and management of the roofs and BMI was able to deliver this.
