

Roofline, Rainwater & Building Products

Including fascias, soffits, rainwater, drainage,
sheet materials and windows, doors & conservatories

MAKING THE DIFFERENCE

MAKE IT HAPPEN

The leading provider of
roofline, rainwater and
building products.

SIG Roofline brings you the highest quality range of roofline, rainwater and building products, expertise and advice anywhere in the country.
And, with our proven, nationwide logistics network and vast supply chain management experience, we ensure you get the right products, in the right place, in the right quantities, and at the right time.

Roofline	4
Rainwater	6
Drainage	10
Internal Cladding	14

External Cladding	24
Flat Roofing Systems	26

Choose SIG because...

... we partner with the leading manufacturers, give you experienced product specialists and provide unparalleled service and support - whoever you are and wherever you are in the country, including:

- Site visits
- Free estimating
- Free samples
- Technical advice on fixing, flow rates, PVCu design, legislation
- Guarantees
- British Standard Accreditation

- Training courses
- Product planning with agreed packages for individual sites and projects
- National coverage
- Stock on the ground

Plus, SIG's extensive fleet of vehicles from small vans to large trucks means that the right transportation is used for delivery to avoid site congestion, maximising your efficiency and productivity.

Making the difference

We always establish a single point of contact within SIG to minimise errors, save time and increase efficiency. It's like

having an extra project partner with you every step of the way: one who combines impartial product expertise and knowledge with an unrivalled depth of product range.

Our strong relationships with all major manufacturers mean we have the reach that allows you to choose the right materials based on your preferred range, colour, finishes, ancillaries and price.

Whatever you need, whether it's roofline and rainwater materials and advice, bespoke windows, doors and conservatories, drainage, cladding or sheeting we've got the range and experience you need.

Choose SIG for Roofline because...

... we stock the most comprehensive range of products available for roofline in the UK.

Roofline work is essential for the continued good condition of a building. That's why we provide everything you need from soffits and fascias to trims.

Cellular

Our comprehensive ranges of PVC-UE soffit, fascia, cladding and window trims meet the criteria of BS 7619: 2010 and are available in a wide selection of sizes and colours (whites, wood grains and colours).

Manufacturer	Products	Length (m)	Sizes (mm)	Colours	Foils	Styles	Warranties*	Accreditations	BBA

Making the difference

Many of the products we supply have achieved BSI Kitemark Certification, ensuring you always get products manufactured to the highest specification. We also provide product guarantees across many of our ranges.

The SIG range

Our PVCu roofline range is available in various sizes, styles and colours from the leading manufacturers including:

- Concord
- Celuform
- Floplast
- Freefoam
- Kestrel
- Summit
- Swish

Choose SIG for ventilation because...

... we help you eliminate the need for unnecessary extra cost due to poor airflow.

Ventilation

The widespread use of insulating materials, central heating and double-glazing in modern homes encourages the build up of significant levels of condensation in the roof space. This can cause a host of expensive, and avoidable, problems from rotting timbers to rusting of metal fixings.

Our range of quality roof ventilation products conforms to BS 5250: 2002 and are suitable for new build and refurbishment situations, including:

- Continuous soffit and fascia vents – for when a traditional fascia board detail is specified
- Cross flow panels – provides an air passage between the roof felt and loft insulation for ventilation
- Lap vents – for increasing ventilation on refurbishment projects

- Eave protection and felt support trays – prevent felt sagging and subsequent pooling of water
- Eave comb fillers – keep birds and large insects from below the eaves of profiled tiles
- Circular soffit ventilators – designed to be fitted to the soffit board prior to installation on new builds

*Individual warranties and guarantees are applied to each manufacturer's products. Please ask us for details.

Choose SIG for PVCu Rainwater because...
... we are synonymous with high quality PVCu rainwater systems, with a reputation for technical excellence and competitively priced products.
Poor roof drainage is one of the most common causes of property damage. Protecting against wet weather means providing good roofline and rainwater work.

Making the difference

All our PVCu rainwater systems are manufactured and marked to British Standard Specifications and are suitable for all types of domestic, commercial and industrial buildings. PVCu systems have a number of advantages that make them a cost-effective solution to rainwater collection and drainage:

- Essentially maintenance free with consistent finish and colour
- Tough, durable and lightweight for ease of installation
- High gloss finish with blemish free surface provides excellent all round weathering and colourfastness
- Comprehensive range of systems, colours and fittings provide solutions to all installation requirements
- Well-defined stylish contours ensure a seamless match with all styles of property, new or old

The SIG range

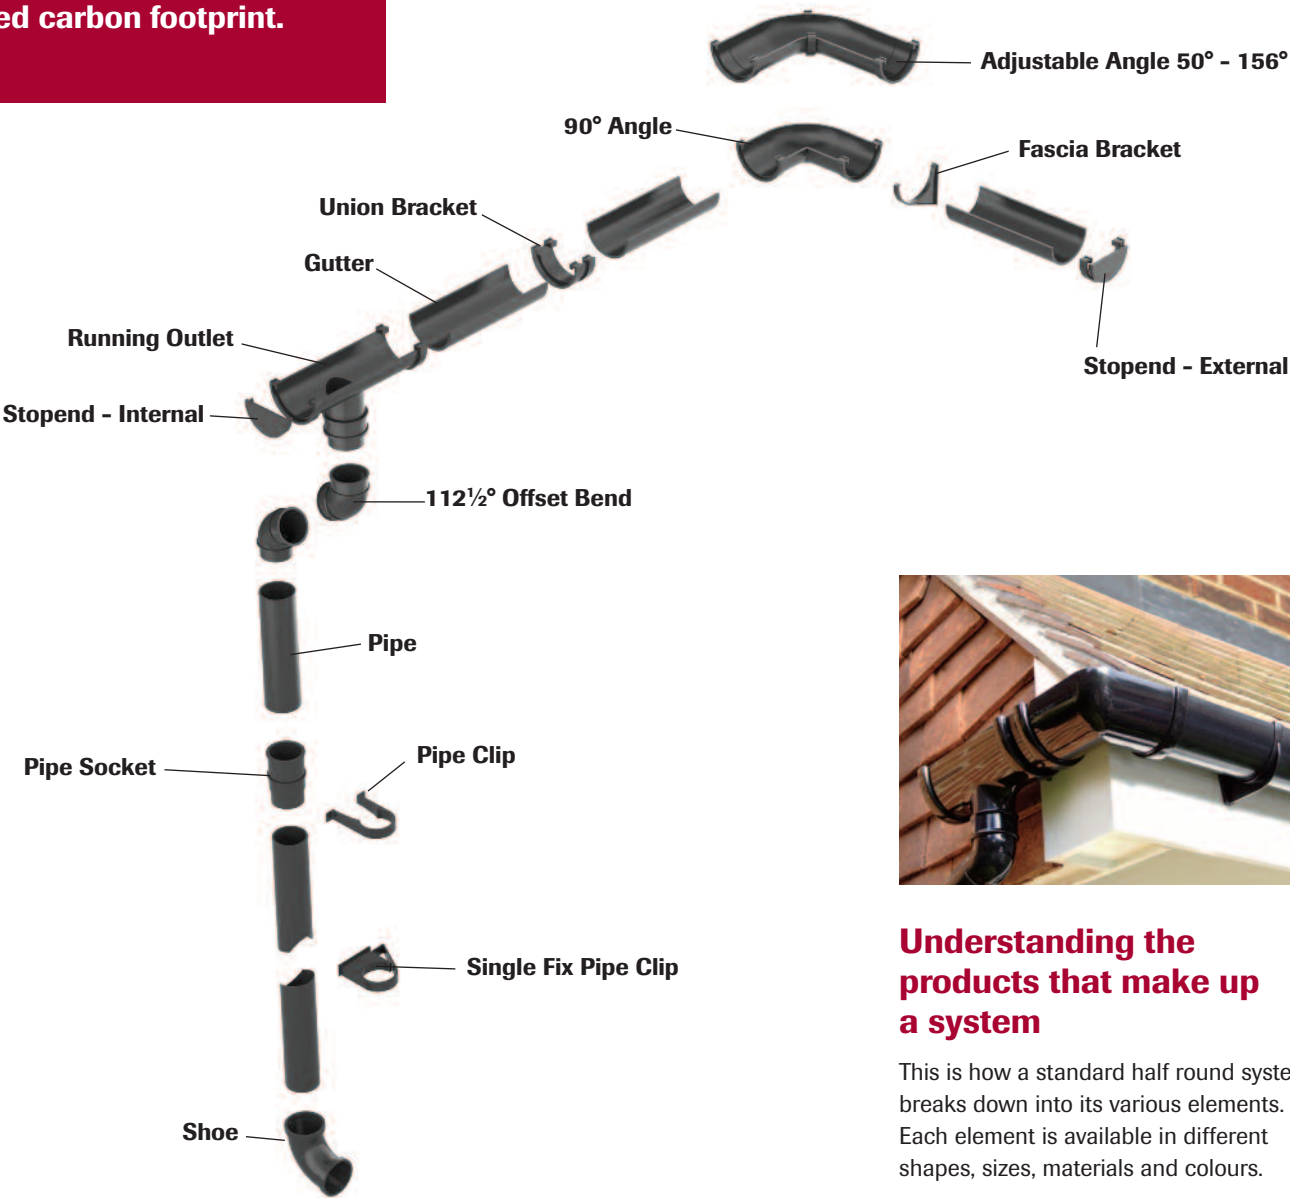

Our extensive range includes:

- Downpipes and fittings (BS EN 12200: 2000 and 1329: 2000)
- Gutters and fittings (BS EN 607: 2004)
- Fascia brackets (BS EN 1462: 2004)

We stock many styles including half round, square, OGEE to high capacity and also cast iron effect from:

- Floplast
- Hunter
- Kayflow

Many of our PVCu rainwater systems are ideal for those who wish to specify quality products that have a reduced carbon footprint.

Understanding the products that make up a system

This is how a standard half round system breaks down into its various elements. Each element is available in different shapes, sizes, materials and colours.

Manufacturer	Products	No. Sizes	Sizes (mm)	No. Colours	No. Foils	No. Styles	Warranties	Accreditations
Floplast	Guttering	6	76 - 170	6	3	6	10	Carbon Trust Certificate, EMS538445, FM 501414
	Downpipes	5	50 - 110	6	3	5	10	
Kayflow	Guttering	4	114 - 120	5	0	4	10	British Standards Kitemark accreditation (Certificate No. KM5008760)
	Downpipes	2	65 - 68	5	0	2	10	

Choose SIG for non-PVCu rainwater systems because...
... we are experts on advising you on the right solution for your project.
There are so many materials to choose from but our experienced product specialist staff are on hand to assist you with the most appropriate product selection and specification.

Systems

Manufacturer	Products	No. Sizes	Sizes (mm)	Material	No. Finishes/Colours	No. Styles	Accreditations	BBA
Alumasc	Guttering	12	75 - 224	Cast / Extruded / Pressed Aluminium	17	13	ISO 9001: 2008 / ISO 14001: 2004 / BS EN 12206-1: 2004 / 1462: 2004 / 1559 / 1706: 2010 / 755 / 8530 / 12056-3	-
	Downpipes	4	63 - 150	Cast / Extruded / Pressed Aluminium	17	6	ISO 9001: 2008 / ISO 14001: 2004 / BS EN 12206-1: 2004 / 1462: 2004 / 1559 / 1706: 2010 / 755 / 8530 / 12056-3	-
	Guttering	4	100 - 152	Cast Iron	9	4	ISO 9001: 2008 / ISO 14001: 2004 / BS460: 1964 / BS476, Part 4: 1970	-

*Premier Standard Rainwater only ** Heritage range only

Making the difference

We pride ourselves on attention to detail and quality.
Our standard products and colour ranges are renowned for their durability and elegance. We can supply to your specifications and are on hand with advice and assistance throughout the construction cycle from initial planning, detailed design and specifications through to production and supply.

The SIG range

We have a wide range of non-PVCu roof drainage systems available, including:
■ Galvanised Steel (meets the criteria of SS-EN 612: 2005 or SS-EN 1462: 2004)

- Aluminium (meets the criteria of BS 8530: 2010)
- Cast Aluminium (meets the criteria of BS 8530: 2010)
- Cast Iron (meets the criteria of BS 460)

Each material satisfies different applications and comes in a variety of system shapes and sizes from key manufacturers:

- Alumasc
- Alutec
- Hargreaves
- Lindab

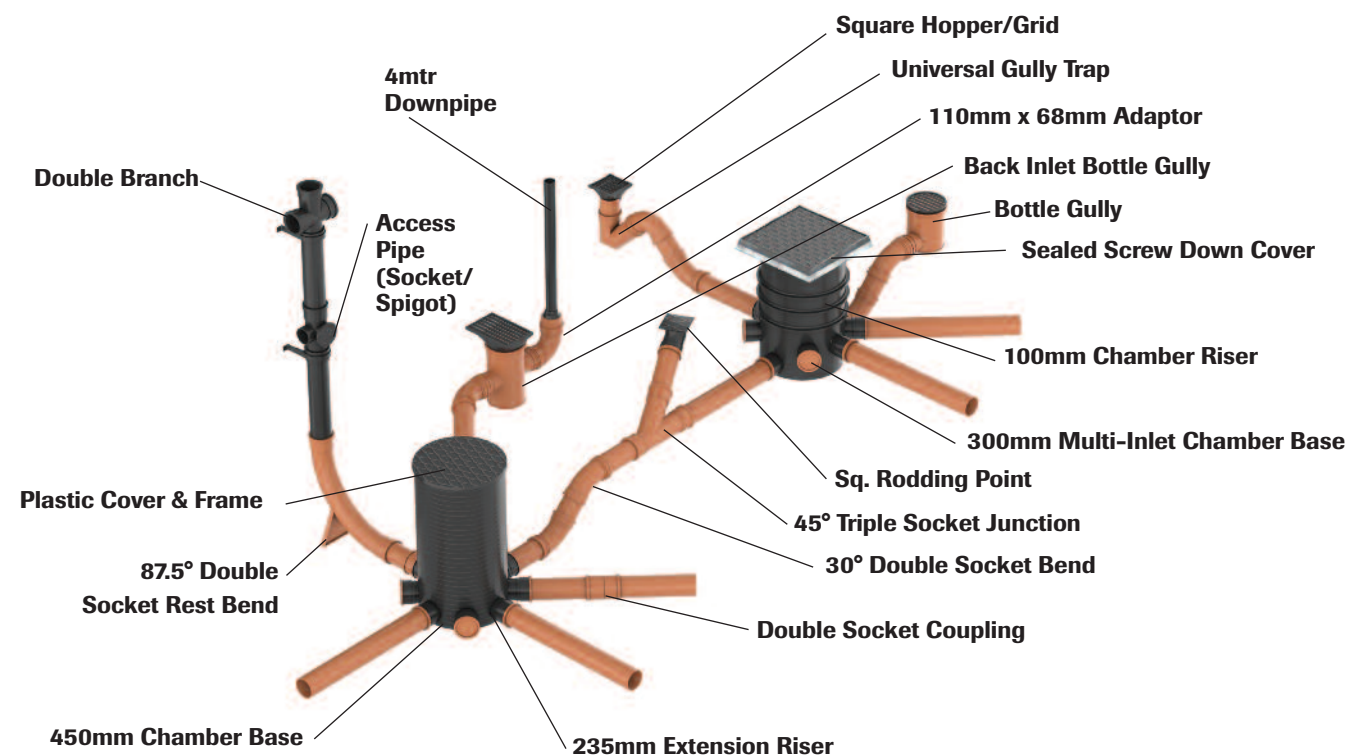

Some things to consider when choosing a non-PVCu rainwater system include:

- Building aesthetics – contemporary, traditional or historic buildings will benefit from the right choice of material
- Colour – some are available in colours rather than their natural finishes
- Size – most come in the same standard sizes of PVCu systems
- Ease of installation – with additional weight and more initial cost, installation is a major consideration
- Environmental issues – produced from ‘natural’ products often means environmental projects suit these systems perfectly
- Certification – most comply to British standards with 2 to 25 year guarantees

Choose SIG for drainage because...

... our complete drainage systems facilitate fast, efficient installation and exceptional reliability to help save you time and money.

Making the difference

All our drainage systems are designed with maximum choice, flexibility, ease of installation and long-term reliability. They are suitable for installation in commercial, industrial and residential developments and are manufactured to the highest possible levels of quality and performance.

And, with a national sales and logistics operation, every customer is guaranteed the best service, every time.

The SIG range

Includes:

- Drain, sewer and surface water pipe work and fittings in diameters from 110mm to 600mm
- Access chambers, gullies and linear drains

All our underground drainage is manufactured to stringent quality standards to ensure a completely reliable product range that will continue to perform. Many of our systems feature a combined lip and compression seal that is secure against dislodgement and makes jointing easier:

- 110mm & 160mm soil system
- Mini access chambers
- 450mm inspection chambers
- Surface channel drainage
- Perforated land drains

Ducting

Our solid wall ducting and fittings come in diameters from 54mm to 160mm and include:

- Rigid general purpose duct
- Rigid twin wall duct
- Coiled twin wall duct

Push Fit Plumbing

Flofit offers a comprehensive choice of flexible pipes and fittings in 10mm, 15mm and 22mm. Suitable for all hot and cold plumbing and central heating systems, Flofit enables faster, easier and more cost effective plumbing that keeps performing.

Suitable for use in both sealed and open vented systems Flofit is designed to withstand constant pressure at high temperatures:

- Pipe
- Elbows
- Connectors
- Couplings
- Reducers
- Tees
- Stop Ends

Accessories

All our drainage products come with a comprehensive range of fittings, accessories and tools to complete the job effectively.

Systems

Above Ground Drainage

All our above ground drainage integrates with our rainwater and soil & waste product ranges. The systems we supply facilitate fast, efficient installation and exceptional reliability, saving you time and money.

All products are manufactured to exacting standards. Our extensive 110mm PVCu ring seal soil system is manufactured to BSEN 4514. The range includes ABS waste pipes and fittings (manufactured to BSEN 5255) in sizes 32mm, 40mm and 50mm and a quality range of multifit outlet traps:

- 110mm soil system
- Pan connectors
- Overflow systems
- ABS waste systems
- Compression fittings
- Traps
- Flex-seal couplings
- MDPE fittings
- Floor & shower drains

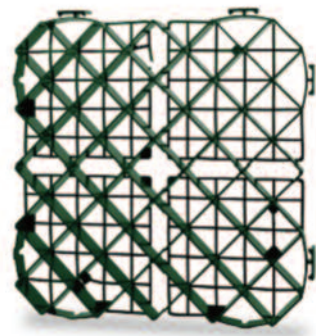

Underground Drainage

Light in weight, safe to handle and easy to install, we provide complete drain, sewer and surface water systems to suit all requirements. A full range of fittings is available with accessories, including: ducting, land drainage, M.D.P.E. pipe and channel drainage.

Choose SIG for specialist drainage because...

... we supply everything from rainwater harvesting and sewerage to grease traps for commercial food services.

Our wide range includes the leading off-mains drainage solutions available on the market today - all manufactured to the highest standards.

Making the difference

Our expert team are available nationwide to provide in depth assistance and onsite guidance, product selection and specification, ensuring you get the right equipment for the job.

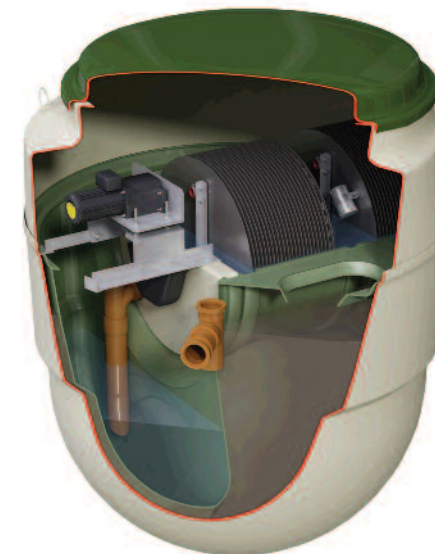

The SIG range

Rainwater Management

Collecting rainwater and diverting it in useful ways is becoming more important than ever as weather patterns change. Designed to collect rainwater from the roof of a house or shed, water butts and diverters are the simplest and most cost-effective form of capturing rainwater.

And, with watering the garden accounting for up to 70% of the water used in hot weather, your clients can drastically reduce their consumption.

- Diverter kits enable you to divert rainwater direct from the guttering downpipe
- Ideal for watering the garden
- Overcomes hosepipe bans
- Still allows enough rainwater to flush drains and sewers

Rainwater Harvesting

Homeowners can save up to 50% of their annual potable water usage with one of our rainwater harvesting systems, reducing demand on valuable water resources.

- Designed to filter and store collected rainwater in robust HDPE tanks
- Available from 1200 litres to 6000 litres including a 1500 litre low-profile option
- Systems provide a modular solution, providing ease of installation and quicker project completion
- Calmed inlet avoids disturbance of settled sedimentation to improve water quality
- Submersible pump provides reliable performance
- Includes three inlets for multiple water sources

Sewage Treatment

For use when a mains drainage connection is not available. All our sewage treatment plants are fully approved to environmental standards. We offer a choice of Septic Tanks, Sewage Treatment Plants and Cesspools depending on your requirements and our range can provide solutions covering a single domestic dwelling right up to large commercial applications.

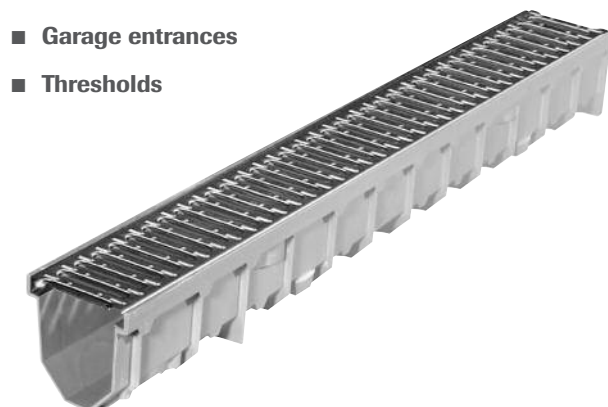

- Extremely reliable with proven three chamber modular system
- Lightweight and robust HDPE systems provide ease of installation and low maintenance
- Manufactured to meet the highest quality standards including requirements for EN12566: 3 in structural integrity and water tightness and also with British Water's 'Flow and Loads' code of practice

Linear Drainage

Effectively removes water from pedestrian areas.

Ideal for:

- Driveways
- Patios
- Garage entrances
- Thresholds

Sewerage Treatment Systems

Ideally suited to serve small domestic residences covering six or twelve people, including a six-person low-profile option.

- Extremely reliable with proven three chamber modular system
- Lightweight and robust HDPE systems provide ease of installation and low maintenance. Manufactured to meet the highest quality standards including requirements for EN 12566: 3 in structural integrity and water tightness and also with British Water's 'Flow and Loads' code of practice

Grease Traps

Provide essential grease management solutions to commercial food services and catering markets to prevent build up of fats, oils and grease from solidifying and blocking drainage systems.

Choose SIG for internal cladding because...

... we provide an extremely wide range of product types and decorative designs that give you a real alternative to ceramic tiles.

Making the difference

We are always available at the end of a phone to give you help and assistance, with our field based sales personnel available to give you face-to-face support.

In addition, we can tailor our products and services to match your requirements with rapid delivery as needed.

The SIG range

With over 60 designs available in a range of colours, all our products are held in stock for immediate dispatch and come in lengths from 2.6 to 6.0 metres. They can

be fixed to existing surfaces, either using adhesives or mechanically and are suitable for use in showers and wet rooms.

- Large tile and mosaic tile effects
- Marble and granite effects
- Slate effects
- Wood and metal effects
- Bold contemporary colours
- Traditional and pastel shades
- Tongue and groove seamless jointing

Suitable for use in practically all situations from bathrooms, kitchens and conservatories to offices, shops and loft conversions our internal cladding brings a variety of benefits over traditional tiles, including:

- Faster to install
- Easier to clean and maintain
- Completely waterproof
- Reduced condensation
- Improved insulation
- No more grouting
- No more black mould

Choose SIG for windows because...
... we are the leading supplier of windows in the UK.
You can rest assured the products and services we supply through our strategic partners are as robust, durable and long lasting as you can get.

PVCu windows:

- Easy to install
- Require minimal maintenance
- Affordable and A-rated and BFRC energy rated
- Secure, with market-leading Yale and Sac Loc security features
- Vast product range including casement, tilt & turn and vertical sliding styles
- Variety of solid colours and natural wood effect foils

Our comprehensive PVCu range includes:

- Flush fitting casement
- Reversible
- Dual swing
- Tilt & turn
- Slide & tilt
- Sliding sash

Timber windows:

- Better designed, better specified and better made than ever before, they add value to any home
- From knot-free, engineered timber providing up to 60% increase in strength and stability
- Single, double or triple glazed with modern traditional designs, A-rated with U-values as low as 1.0W/m²K
- With secure multipoint locking mechanisms for peace of mind
- Fully painted with flexible micro-porous paint, with stained or aluminium clad options
- Beautiful and durable with 8-year paint guarantees and a full 30-year lifetime guarantee on the timber itself
- Bespoke by design, from Georgian sash windows with authentic period detailing, to contemporary casements, to one-off bespoke orders
- Made from slow grown timbers from sustainable, renewable and certified resources

Aluminium windows:

- Available in smaller frames for a traditional farmhouse style property or large expanses of glass for modern houses
- Complete range includes traditional hinged casements, vertical sliders (that function like sash windows), tilt-turn and reversible windows
- High security friction hinges
- Shootbolt locking mechanism with high strength brass alloy bolts into the die-cast keeps in the outer frame
- Exceptional quality that exceeds the required standard

Making the difference

SIG supplies high quality, energy efficient PVCu windows throughout the construction industry. Our advanced glazing products incorporate insulated frames, the latest security features, quality double glazing, weather tight seals and multi-chambered profiles ensure heat loss is kept to a minimum. Where noise is an issue, the thermal insulation properties of PVC and a unique Q-Lon gasket will help to minimise disturbance from the outside world.

And, as a customer, we can help reduce your costs through the use of our branch waste disposal facilities* and extensive warehouses, so you only carry the stock you need.

The breadth of our range gives you the beauty of real wood, the practicality of PVCu and the versatility of aluminium. Each material comes with a number of advantages...

*Available at SIG WIndows branches only – please contact your local branch for further details.

Composite Doors

Our composite entrance doors replicate the look and feel of traditional timber and are used in all types of properties.

- Wide range of styles and designs available including solid doors and semi and fully glazed options
- Choose from Polyurethane or Solid LVL (Laminated Veneer Lumber) door construction
- Multi-point locking system included for improved security
- Secured by Design and Fire doors available
- Extensive range of hardware
- Matching side and top light options
- Aluminium disability low threshold option available
- All sections available fully featured
- Outer frames incorporate a triple sealing system for improved compression and weathering
- Dedicated galvanised steel and aluminium reinforcements
- Framing predominantly white, for use with solid coloured slabs. Available in woodgrain finishes to match woodgrain effect door slabs
- Proprietary ventilation devices can be used on all designs
- A range of head details available including head extensions and one piece head vent with facility of recessed outer grill

Making the difference

With over a decade of door supply experience SIG provide unbeatable service and support, enabling you to get the most out of your business. You can always rely on us to provide a truly one stop shop with:

- Excellent customer service with consistent and flexible lead times and responsive after sales service
- Fast and convenient ordering
- Expert product advice and technical support team
- Business support teams and marketing support on hand to help you grow your business
- A national distribution network giving you local choice

The SIG range

Our selection of doors are supplied in PVCu, timber and aluminium from market leading manufacturers and our range includes:

- Residential doors
- Bi-fold doors
- Double & French doors
- Patio doors
- Panel doors
- Stable doors
- Front doors

PVCu Panel Doors

Our collection of high quality PVCu panel doors are available in a multitude of panel styles with technical and practical advantages. All products conform to British and European standards surrounding manufacture and performance.

They are tough and secure and fitted with the best security features including multi-point locking mechanisms. The 'Secured By Design' accreditation for the doors and hardware is a unique achievement which gives you peace of mind when offering these products to your customers.

We also offer an extensive range of insulated features and side panels with glazing options designed to accommodate every type of installation.

Bi-fold, Patio & French Doors

A great way to open up a room into conservatories, terrace, balcony, extension or space outside our Bi-fold, Patio and French doors offer ideal solutions.

Stylish, strong and energy efficient, they instantly brighten and bring the outside in, creating a whole new living experience. But it's not just the visual appeal, as they are manufactured using the highest grade materials and to the finest of tolerances to provide a tight seal, with glazed and solid panels.

All available in PVCu, timber and aluminium with high security locks. Toughened or laminated glass is fitted as standard.

Ancillaries

A comprehensive range of ancillaries, including add-ons, corner posts and couplers.

Designed to accept multi-point locks and various hinge types to achieve desired security levels.

Handles, hinges and letterplates available in white, black, gold and chrome.

Choose SIG for conservatories because...

... we provide unbeatable service and support, enabling you to get the most out of your conservatory business.

From providing comprehensive information about designing and installing conservatories and orangeries, to full installations and roof only solutions that transform light and space, we do it all. With over a decade of conservatory experience we'll give you beautiful solutions to suit any project.

You can always rely on us to provide a truly one-stop-shop with:

- **Excellent customer service with consistent and flexible lead times and responsive after sales service**
- **Fast and convenient ordering**
- **Expert product advice and technical support team**
- **Business support teams and marketing support on hand to help you grow your business**
- **A national distribution network giving you local choice**

All our Ultraframe roofs are approved by the British Board of Agrément (BBA), which has assigned them with a life expectancy of at least 25 years as they will endure:

- 15,300mm of rainfall.
- 460 days with snow falling.
- 57 days of hail the size of peas.
- 9,125 days with temperatures in the range of -15°C in winter to +35°C in summer.
- 300 visits by window cleaners, house painters and aerial installers.

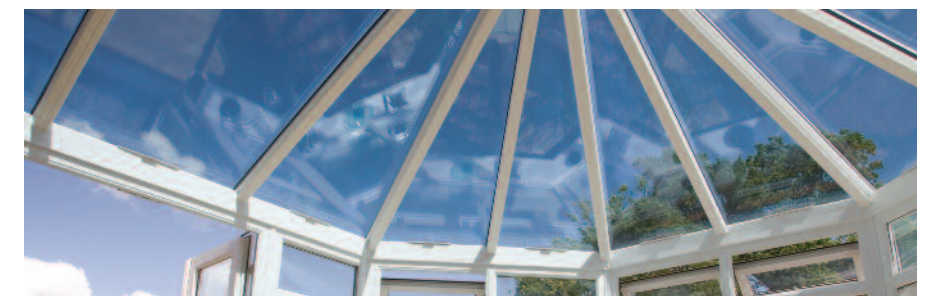

Making the difference

As an established distributor we offer the widest range of styles with a range of options for personalisation. Whether it's choosing the style of conservatory that's right for your project, or producing CAD drawings and design of bespoke solutions, we can assist you every step of the way, including with:

- **Larger spans with a portal system**
- **Energy performance and light transmission levels**
- **Ancillaries and options such as roof vents, box gutters, blinds**
- **Specialist glazing including self-cleaning active glass**

The SIG range

From the T-shaped, practical Lean-To and the stunning Lanterns we've got a style to suit your customers' tastes. And, with the introduction of the new range of 'Extension' style systems such as 'Orangeries' (including 'Living' Room) and the Italian Renaissance inspired 'Loggia' systems, we can offer you the opportunity to provide new solutions to your customers'.

All the conservatories we supply:

- **Are extremely thermally efficient to ensure comfort all year round**
- **Are approved by the BBA (British Board of Agrément) for at least 25 years**
- **Are competitively priced with marketing support packages to help you grow your business**

Our Ultraframe roofs are built to last with:

- **Double glazed glass units required to meet full safety glazing material to BS6206**
- **Polycarbonate glazing material that must be strong and shatterproof**

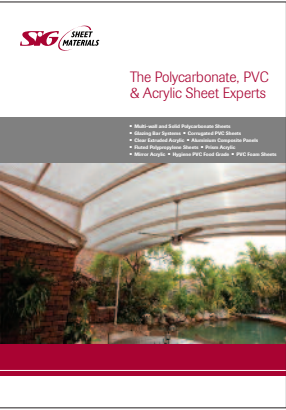

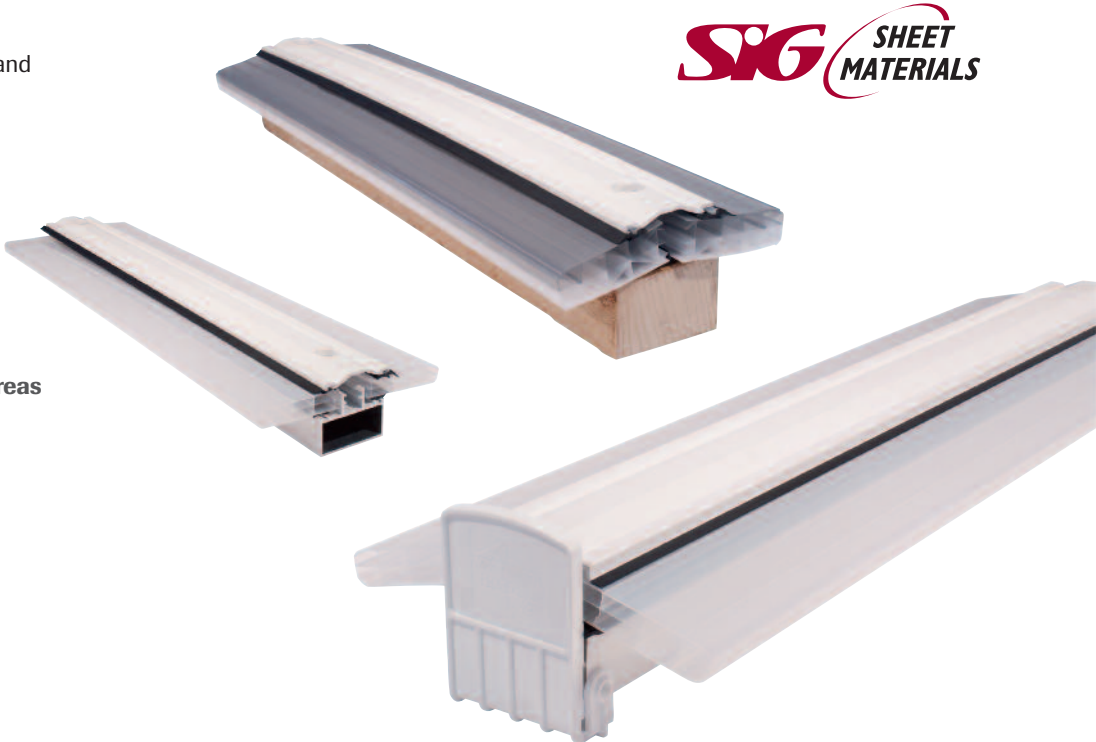

Choose SIG for sheeting solutions because...
... we offer a wide range of high quality sheet products from multi-wall (including multi-layered) polycarbonate to hygienic cladding to PVC foam sheet and a full range of ancillaries.
All our products are produced in extremely clean manufacturing conditions to help retain their integrity.

Systems

Sheeting materials are truly versatile and supplying such a varied range of materials means it can be used extensively for:

- Agricultural warehouses
- Canteens & restaurants
- Commercial dispensers
- Commercial offices
- Conservatories & lean-to roof areas
- Construction partitions, wall cladding & interior decoration
- Construction signs, displays & exhibition boards
- Control cabinets & panels
- Corrosive environments, air & ventilation ducts
- Covered swimming pools
- Diffusion covers for fluorescent lighting
- Displays, art protection & signs
- Food manufacturing, processing & preparation structures
- Grandstands & stadia roofing
- Greenhouses
- High-traffic acoustic barriers
- Industrial roofing & glazing
- Light boxes & fixtures
- Lightweight high-clarity glazing
- Machine guards
- Plating of food transport vehicles

Making the difference

We are one of the leading suppliers of polycarbonates, plastics and glazing systems in the UK, carrying a large and varied stock of sheet materials, building profiles and conservatory glazing products. As well as state-of-the-art computerised flatbed cutting machine for cut to size and shapes in polycarbonate sheeting.

We offer technical support to assist you in solving virtually any sheet material problem. Our extensive brochure offers an overview of all the products available and their usage, contact us for a copy.

The SIG range

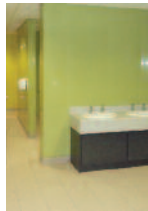

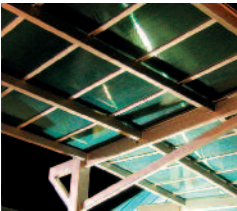

We stock a wide variety of sheeting materials, including:

- Multi-wall Polycarbonate
- Multi-layered multi-wall structured polycarbonate
- Palopaque PVC Cladding
- Corrugated PVC Sheeting
- Hygiene Food Grade PVC Sheet
- Rigid Foam PVC Sheet
- Aluminium Composite Panel
- Canopy Systems
- Glazing Bars

- Privacy & safety glazing / partitions
- Production & sorting systems
- Retail display & dispensers

Glazing Bars

Our glazing bars offer a quality finished product for all of your polycarbonate roof glazing solutions. Available in White or Brown, the range includes self-support bars (up to 6m free span) and rafter support bars (up to 7m lengths) as well as purlin bars and wide range of caps, gaskets, cap screws, stop ends and mounting plates.

Choose SIG for external cladding because...
... our range of external cladding gives you infinite scope for designing building facades that are functional, durable and stylish.

You can install our range of external cladding horizontally, vertically or diagonally. And with a variety of textures and a comprehensive choice of colours, you have the flexibility to create any design you want. It is particularly ideal for multi-dwelling developments or traditional regional styles.

Making the difference

Cladding is a colourful and versatile weatherboard that offers the texture and

natural beauty of timber while delivering the maintenance-free durability of fibre cement or PVCu.

Suitable for both classic and modern designs, our cladding products are highly versatile and can be used alongside traditional building materials such as brick, timber or stone. So whether your requirement is aesthetics, thermal insulation, renovation or decoration, external cladding offers maintenance free, cost-effective surface solution.

The SIG range

We stock a variety of fibre cement and PVCu cladding that offer a range of benefits, including:

Fibre cement features

- Low maintenance, highly durable
- Available in 11 unique colours
- Easy installation
- 10 years limited warranty
- Minimal waste of product
- A2 fire rating

PVCu features

- Fixed vertically, horizontally or diagonally
- Available in four styles:

- Smooth Shiplap with 150mm coverage
- Smooth V-joint with 100mm coverage
- Textured 150mm and 300mm
- Featheredge 270mm embossed cladding board
- Smooth Shiplap and V-Joint systems available in all white and wood grain colours
- Embossed cladding systems are available in a wide range of colours to complement and enhance different installation and design applications
- A range of trims, covers & joints available in all styles

Choose SIG for flat roofing because...
... we are the leading flat roofing specialist supplier in the UK.

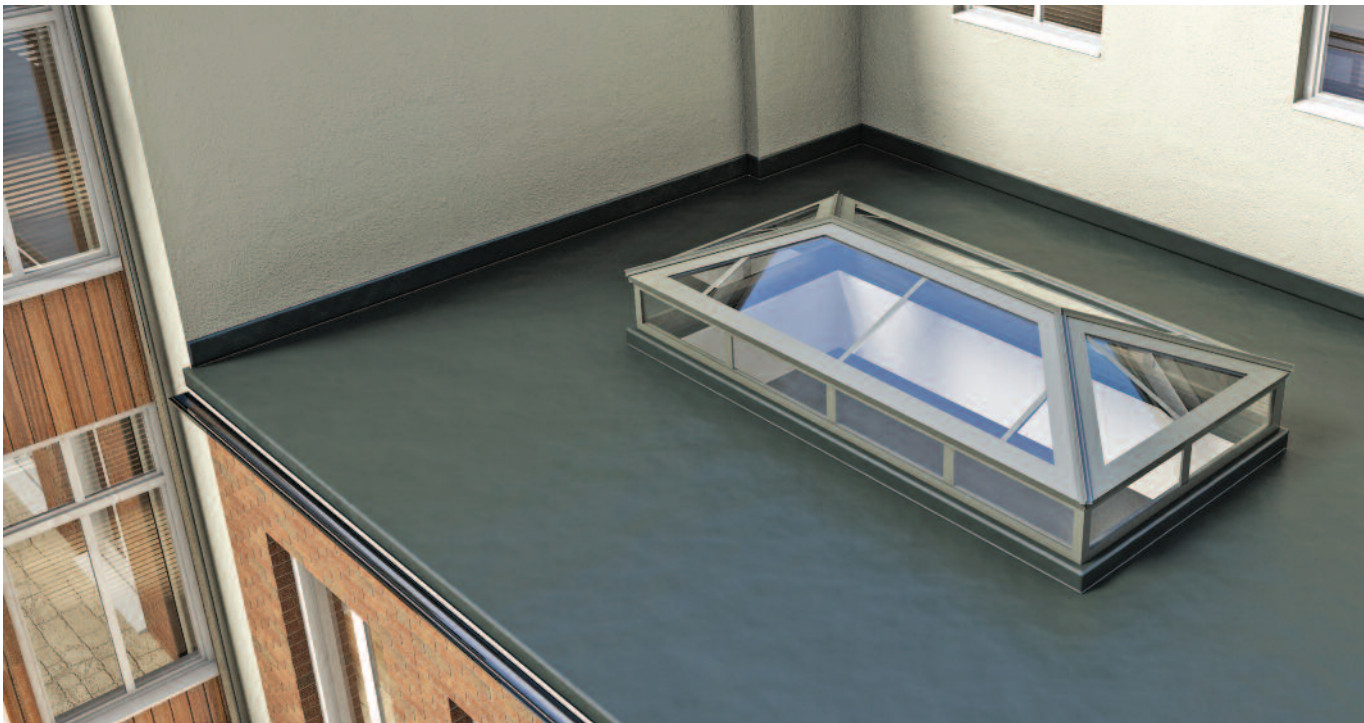

The systems we provide range from cutting edge modern roofing materials through to the more traditional techniques. With a rich depth of knowledge underpinning our entire product range, all our tried and trusted specialist solutions are competitively priced and give outstanding value.

Making the difference

Our cold applied liquid membranes such as GRP (Glass Reinforced Plastic) and

Fix-Rcryl are a patch and repair product, whilst EDPM is ideal for creating flat roofing solutions that are extremely strong, completely waterproof and long lasting.

Quick and easy to apply by both roller and brush for tack-free finish once cured, you don't need naked flame and heating equipment. They will form to any shape and can be applied to concrete surfaces and a range of metals when using G4 primer (please seek advice or test a small application).

The SIG range

GRP – choose it for full roof build or repair

- Cures to a hard, very attractive, seamless finish
- Colour change system indicates when catalyst addition to resin has taken place
- Isophthalic topcoat gives superior performance in finish, long-term UV protection and weathering
- Remains watertight and maintenance free for many years
- Proven technology used in boatbuilding
- Wide choice of colour finishes and non-slip

FIX-Rcryl – choose it for patch and repair

- Suitable for application in damp conditions
- Unaffected by temperature change
- Gives outstanding adhesion
- Ready to use giving instant waterproof protection
- Provides maximum solar reflectivity if solar reflective paint

EPDM – choose it for full roof build or repair

Easy to use, durable and versatile Ethylene Propylene Diene Monomer (EPDM) is the most popular material for both new and re-roof low-slope roofing applications.

Our single-ply EPDM roofing systems are based on a high-performance synthetic rubber compound. It provides outstanding weathering characteristics in climates worldwide. From office buildings and distribution warehouses to hospitals and schools, We have an EPDM roofing solution that's right for you.
