

# INDUSTRIAL ROOFING CENTRE

## DELIVERING INDUSTRIAL ROOFING SOLUTIONS

### BUILDING SPECIFICATION & LOCATION

Questions at the point of query to determine the type of project and what is required or expected.

### CUSTOMER SPECIFICATION

What specification does the project require? Is there anything specific needing to be considered on the project i.e. site restrictions, affordability.

### REGULATION COMPLIANCE

Legal requirements – is there anything that needs to be considered?

### DESIGN COLLABORATION

What does the customer want the building to look like? What solutions do we have to help?

### BUDGET MANAGEMENT

Are there budget constraints on the project and what solutions do we have to help the customer? Where possible buying from one supplier to reduce costs for delivery – is this possible?

### MATERIALS

Looking at all the suppliers to produce a product diagnostic approach, finding the right product for your project.

### SCHEDULING

Supporting customers to make sure the right items are delivered in the right order for the project to run efficiently.

### ON-SITE CONSIDERATIONS

Is there access for large deliveries? Are there offload facilities available on site? Industrial Roofing Centre will support project managers to ensure that orders are delivered conveniently.

### WARRANTIES

Our products are supported by warranties and the we can assist the customer in securing these warranties.
